

## **OUTREACH PROGRAMME: NIDAAN**

### **Department of Computer Science**

Department of Computer Science, Indraprastha College for Women as a part of Project Nidaan, Outreach Programme for the Waste Management in college, actively and enthusiastically participated to spread awareness about proper waste management and enlightened the students about the present waste management practices in our campus.

In this Project, all departments are putting extreme efforts to make the best use of this opportunity and to contribute to Project Nidaan. This time(20th January, 2020 to 3rd February, 2020), the students of the Computer Science Department showed utmost interest and volunteered themselves for this initiative. Thereafter, volunteers conducted few activities and awareness events to make others motivated and help them understand the need of the proper waste management practices at all places.

The volunteers showed great teamwork by distributing the work among themselves and conducting various surveys and competitions to reach the maximum students of the college. Firstly, the students conducted a survey to analyse how much other students know about the present waste management practices in our College Campus. The survey included the questions based on the process of waste segregation in our college. We got responses in huge numbers, in which many students claimed that they don't know about the proper waste management practices followed in IPCW. So, to make students aware of the same, the volunteers of the Computer Science Department conducted various other activities which were open for all departments.

The volunteers conducted online events and competitions such as Slogan Making Competition and Online Quiz on the social media account of the Computer Science Department to raise awareness among the students about the waste segregation practices.

Additionally, the volunteers of the Outreach Programme conducted an E-Waste Management Drive wherein the volunteers received e-waste from the students in college which will be submitted to the e-waste collection point in college. Also, some amount of E-waste such as fairy lights will also be utilised by the department for decoration purposes and computer science projects.

Moreover, students also made a short documentary to help other students know and understand the current waste management practices in college. These students also actively volunteered to make the surroundings in the campus clean and even advised others to do the same.

Last but not the least, these students not only tried their best to create awareness among the students and enlighten them about the ongoing Waste Management Practices in Indraprastha College for Women, they themselves felt motivated and will definitely take this initiative forward.

Overall, it was a successful effort from the students of the Computer Science Department to make a mark through this initiative.

## **List of volunteered from Computer Science Department**

1. Aanchal Singh
2. Archana
3. Deepti Dalakoti
4. Kajal Kumari
5. Khushboo Verma
6. Komal Yadav
7. Mansi Saini
8. Preeti Nanda Mantry
9. Saumya Gupta
10. Shreya Sharma
11. Shweta Bhardwaj
12. Surbhi Rani
