NIDAAN PAKHWADA

REPORT

Nidaan Pakhwada: Day 1

Date: 1st February 2020

The volunteers from Department of Economics held a meeting to delegate various duties that had to be carried out during the fortnight.

Event In-charge and Event Coordinator were asked to carry out a survey of crucial dustbin locations and determine the times of the day when these were used most frequently by the students. Using this information they had to assign time slots to the volunteers and the locations to be monitored.

They were also assigned the task of taking attendance of the volunteers on a regular basis to ensure that the initiative is a success in true sense.

Social Media Coordinator was asked to create posters/messages/videos to create awareness by sharing them on all the social media platforms used by the students of the college. She was also assigned the task of covering the whole initiative by capturing the photos of the volunteers in action.

Creativity Head was asked to come up with various 'Best Out of Waste' ideas, the purpose of which was to be discussed later.

Volunteers were assigned the task of monitoring the dustbins, ensuring that the students throw the garbage in the correct bins; don't litter around; are made aware of the different kinds of bins provided in the college campus.

All the volunteers were given a whistle to help them in performing their duty. Badges were given, it helped in easy identification of volunteers by the students and prevented them from making mistakes while disposing waste.

Nidaan Pakhwada: Day 2-6

Date: 2nd February 2020-6th February 2020

The volunteers actively monitored the bins. They ensured that the students were disposing waste in the right manner, following proper segregation.

Volunteers positioned themselves across the length and breadth of the campus to make sure no place is left where errors could be committed while disposing waste.

Posters put up near the bins

Project Nidaan
What Goes Where?

1. Green Bin (Biodegradable Waste)  Accepted Leftover food Used Tissue Paper Hair Match Stick/Cotton Tea/Coffee Bags Not Accepted Aluminium Foil Paper	2. Blue Bin (Recyclable Waste)  Accepted Plastic, Metal & Glass Tetrapacks (Milk, Juice, Lassi etc) Aluminium Foil Gift Wrap Paper Used Paper Cups Not Accepted E Waste Sanitary Waste	3. Paper Collection Boxes (Cardboard Boxes kept in corridors)  Waste Paper News Paper/Magazine Pamphlet/Poster Cardboard	4. Incinerator (Placed in the toilet complex near canteen)  Incinerator Sanitary Waste Disposal
---	--	---	--

5. E-Waste:
 NSS Drives

6. Leaf Composter:
 For Yard Waste

Posters like this one were shared on all the social media platforms and put up near the bins across the campus for the duration of the Outreach Event.

Nidaan Pakhwada: Day 7 (College Day)

Date: 7th February 2020

Indraprastha College for Women celebrated its 97th College Day on 7th February 2020. The occasion proved to be a golden opportunity to increase awareness about 'Project Nidaan'. The Department of Economics ensured that volunteers were present in the Sports Field where lunch was being served. Waste disposal was a major concern. A good number of bins were placed in the area and all these bins were guarded by the volunteers. Apart from students, the volunteers got the opportunity to interact with parents, teachers and other guests. They were told about the initiative being taken up by the College.

Placement of bins in the Sports Field where lunch was served

Nidaan Pakhwada: Day 9-13

Date: 9th February 2020-13th February 2020

The volunteers were asked to make the awareness campaign more aggressive. Now, volunteers started interacting with students. They engaged in conversations in addition to the earlier monitoring.

Students were now corrected using whistles if they made an error in throwing the waste. Whistles proved to be immensely effective as it added an element of humiliation if the mistake was committed.

Nidaan Pakhwada: Day 14-15

Date: 14th February 2020-15th February 2020

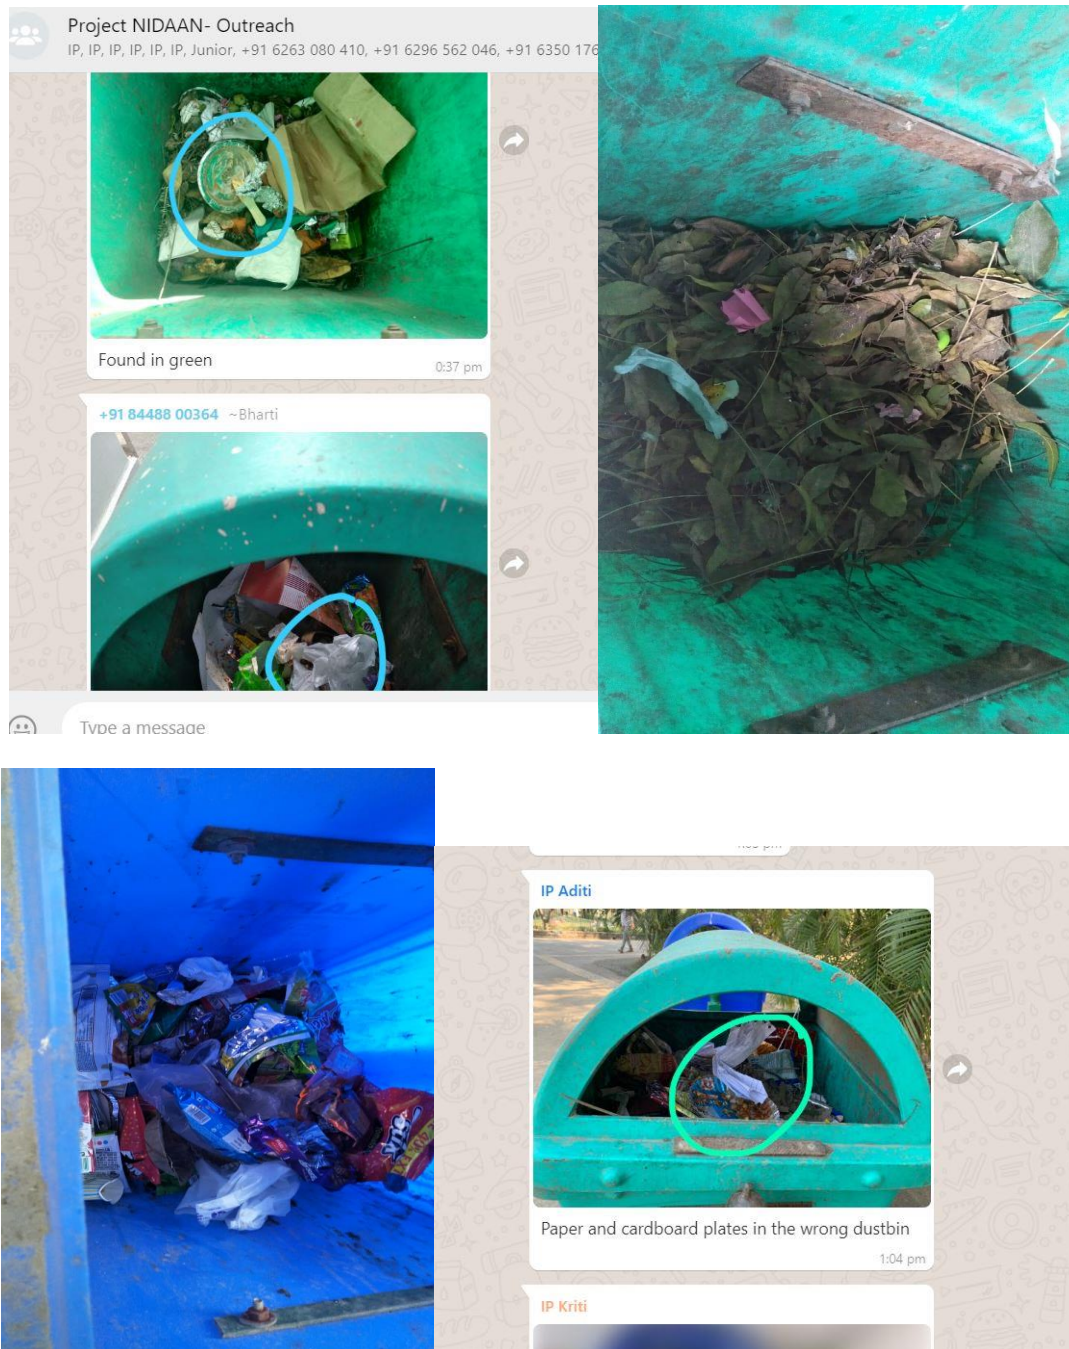

The last two days were utilized in cleaning the campus. This was done to set an example in front of the students and create environmental consciousness in true sense. Students took note of the things that volunteers of Department of Economics did, and learnt from them.

Volunteers in Action

Constant Surveillance

Pictures were shared by the volunteers with the rest of the team to coordinate well and come up with better plans to ensure proper disposal of waste by students.

Experience of Volunteers:

"Environmental degradation is a contemporary burning issue of today's world. Many methods and habits have been stated to curb this burning issue and waste segregation(dividing waste into dry and wet) is one such important method. I have always been an environmental enthusiast and being part of Project Nidaan have helped me in fulfilling my duty towards the planet. This has been a learning curve for me. I now have a better understanding on waste segregation. I have also realized that despite the many workshops and seminars conducted by the college there are still many students who are still confused about which waste to throw in which Dustbin. I have also encountered some students who are ignorant . They did not listen to what we said. So all in all I think Project Nidaan needs to be continued with much vigour and enthusiasm."-Damini, I Year

"I had observed that there is improvement from day one till now. Actually problem is people don't know which waste must be thrown in which colour of dustbin. So I think there must be a seminar to spread awareness among youth.Overall my experience was good."-Charu, I Year

"Personally I was able to discover and thereafter solve the problem of unawareness amongst the canteen staff. Even they were not aware of how to segregate and if paper cups were to be thrown in blue bin and why. So that was a win, but overall I wasn't able to impact a large amount of people because of the timings. However, I feel even a few is a great start."-Priyasha, I Year

"I had a great experience volunteering for project nidaan and ensuring that people keep our campus beautiful, always. It was however, not always easy to help with waste management, as I still saw plastic packets in green dustbins when I was on duty, which one cannot figure when they were thrown. However, this was a small step towards keeping our surroundings clean and was a brilliant initiative!"-Alankrita, I Year
